#### LEGISLATIVE COUNSEL'S DIGEST

AB 1384, as amended, Miller. Gasoline: vapor recovery systems.

Existing law requires the State Air Resources Board to adopt procedures for determining the compliance of any system designed for the control of gasoline vapor emissions during gasoline marketing operations, including storage and transfer operations, and additional performance standards to ensure that systems for the control of gasoline vapors from motor vehicle fueling operations do not cause excessive spillage and emissions. Existing law prohibits the state board from requiring a gasoline dispensing facility that meets certain requirements from undergoing an Enhanced Vapor Recovery Phase II upgrade until April 1, 2011. Regulations adopted by the state board require an

Enhanced Vapor Recovery Phase II upgrade by April 1, 2009, as provided.

This bill would prohibit the state board from requiring a gasoline dispensing facility owned or operated by a local government that does not meet these requirements from undergoing an Enhanced Vapor Recovery Phase II upgrade until April 1, 2010.

*This bill would declare that it is to take effect immediately as an urgency statute.*
